Finish by the end of 11th grade. Typically for recruited athletes, naturally high scorers, or special cases.

For students who wish to complete all test prep during the summers because their schedule during the school year is already too impacted.

- **Early Applications:** The September ACT and October SAT will qualify for Early Action (EA) or Early Decision (ED) applications.
- **Subject Tests:** It is typically recommended to take subject tests on the May or June SAT exam dates. Take Subject tests that align with your AP courses.
- **Super-scoring:** After choosing between ACT or SAT, we encourage all students to take at least two official exams to make use of potential super-scoring at various colleges.
- **Pre-ACT:** If your school administers a Pre-ACT during the Fall of 10th grade instead of the PSAT, take both a mock SAT and ACT in the Spring of 10th grade.
